DETAILED ACTION

1. Claims 1-26 were pending in this application at the time of the previous Office Action. Claims 1-14 have been cancelled by the amendment filed 12-27-05. Therefore claims 15-26 remain pending and have been examined.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 15-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 15 and 21 each contains the passage: "...apparatus for reproducing data of which a data signal, to which a fixed value is added at a predetermined timing to blocks of main data, is compressed and encrypted from a record medium,...". It is unclear what the phrases "...of which a data signal..." and "...encrypted from a record medium..." are intended to mean within the context of the claim language.

Claims 16-20 and 22-26 are dependent on claims 15 and 21 respectively and are thereby rejected on that basis.

Allowable Subject Matter

4. Claims 15 and 21 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

5. Claims 16-20 and 22-26 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter:

The closest prior art in the field, McCalmont US 4,433,211, does not teach features of the claimed invention of control of a step of compressing or decompressing a set of main data via the result of a comparison step between a valued retrieved from a decompressed subset of data associated with the main data and a stored value.
